

## Number Lines

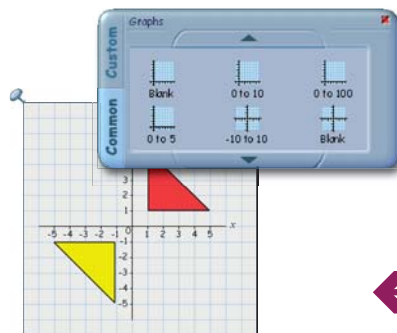

- Drag the number line you want onto the page.
- To move the number line on the page, drag it by the blue thumbtack.
- You can customize the number line to also serve as a timeline

**TIP** You can drag the individual numbers, for example the prime numbers, off the number line.

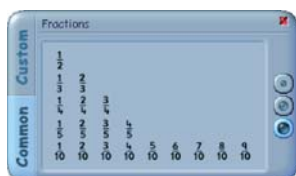

## Graphs

- Drag the graph you want onto the page, or click on the **Custom** tab to create a graph of your own.

**TIP** Use shapes on the graph from the **Shapes** palette on the **Easiteach Toolbar**.

## Fractions

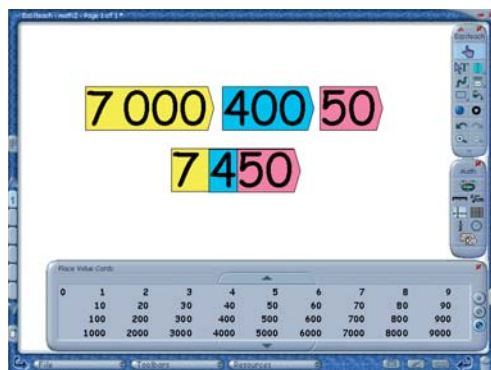

- Drag the fraction you want onto the page.
- The size of the fraction can be changed using the **Size** buttons.

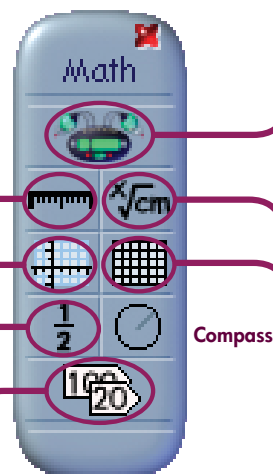

## Place Value Cards

- Drag the number you want onto the page.
- To display numbers with decimal places, click the up arrow.
- To display larger numbers, click the down arrow.

**TIP** The color of the card can be changed with the **Fill** tool.

## Easiteach Math Toolbar

Compass

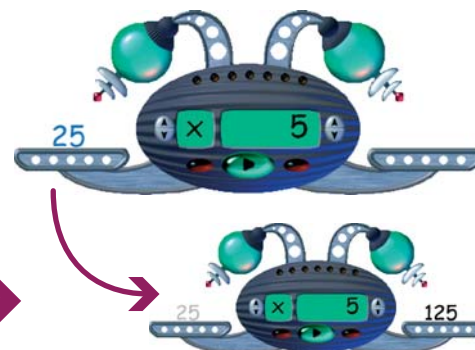

## Calculator

**TIP** Use the **DP** button to set the number of decimal places you wish to display.

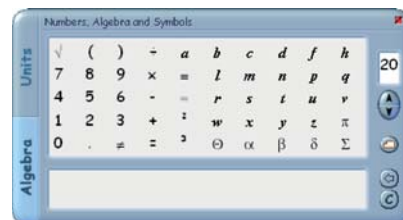

## Function Machine

- Drag a number (or fraction) onto the platform of the **Function Machine**.
- Use the **Operator** buttons to change the operator (+ - x ÷) and to change the number (operand).
- Click **Calculate** to activate the **Function Machine**. The answer will appear on the right platform.

**TIP** The **Function Machine** makes a noise when you activate it, so make sure your speakers are switched on!

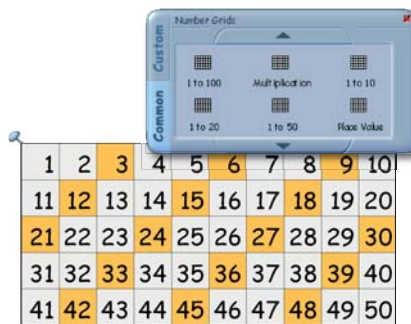

## Numbers, Algebra and Symbols

- You can drag individual characters straight onto the page.
- Alternatively, click on characters to place them in the preview area and then drag whole expressions onto the page.

**TIP** Use the **Background** button to place characters onto a card background.

## Number Grids

- Drag the number grid you want onto the page.
- You can move the number grid to a different position by dragging its blue thumbtack.

**TIP** You can drag individual numbers off the grid and color cells with the **Fill** tool.
